

PRIME vs Pelangi Accounting — Feature Coverage Matrix

Source: [PRIME-Integrated Facility&Property Mgt System Solution-PRIME-2025.pdf](#) (see [pdf.md](#))

Apps compared:

- **Accounting** → [PELANGI-ACCOUNTING/](#) (Laravel + Filament)
- **Inventory** → [inventory/](#) (Laravel API — project & delivery management)

Status rules:

- **Covered** = user-facing surface exists (Filament Resource/Page/Livewire or API route/controller). Data-layer-only (model / migration with no UI) does NOT qualify.
- **Partial** = a related feature exists but does not fully match PRIME's scope.
- **Not covered** = no user-facing feature in either app.

What is covered

Accounting app covers the full financial accounting core: GL (COA, account mapping, opening balance, journal entries), all 6 financial reports (P&L, Balance Sheet, Cash Flow, Trial Balance, General Ledger, Account Balances), full AR/AP cycle (Sales/Purchase Orders → Invoices → Returns → Aging → Payments), Cash & Bank (receipts, disbursements, transfers, advances), Fixed Assets (register, category, and all transaction types — movement, depreciation, disposal — via TransactionsRelationManager with optional auto-journal), Warehouses, Master Data (products, taxes, payment terms, contacts, business types), Users/Roles/Companies (multi-company), and Invoice sync API. It also adds a full **HR & Payroll** stack not present in PRIME (employees, attendance, leave, overtime, salary components, payroll + BCA export, THR, bonus).

Inventory app extends coverage with project management (Project master, PO Deposits, invoice progress), Delivery Order management (full DO lifecycle with items and delivery logs), basic inventory stock read, marketing follow-up, and bi-directional sync with the Accounting app.

What is not covered (gaps vs PRIME)

All **property / facility management** specifics are missing: tenancy & lease contracts (all types), utility meter billing (electricity / water / gas / overtime / communication), amortization, tenant reminder / penalty / deposit, helpdesk + work orders + preventive maintenance, standalone inventory operations (warehouse transfer, stock opname, cut-off), AP draft debit notes, bank reconciliation UI, petty cash, budget management, multi-currency GL, period/yearly closing, e-Faktur, Virtual Account, Email/SMS blast, mobile apps (PRIME Mobile & PRIMO), and the full EIS dashboard suite.
